

#### **ABSTRACT OF THE DISCLOSURE**

A lawn mower cleaning tool includes an elongated handle and a cleaning blade attached to one end of the handle. The handle has opposite ends, a longitudinal axis, and a length greater than the radius of the mower blade. An angled cleaning blade member attaches to one of the ends of the handle. The blade member includes a shank portion extending longitudinally from the handle and a scraping blade portion attached to the shank portion and diverging therefrom in a radial direction. Thus, the mower deck can be cleaned without the operator's hands entering into close proximity with the mower blade.
